

FT Search Manager

Situation

You know you have information about a topic which is necessary for a current project, but where did you store the information?

With FT Search Manager you can search simultaneously through multiple local, server or archived databases, pdf's and in IBM Quickr places, blogs and wiki's, by using a Lotus Notes client, Internet browser or mobile device.

Features

- Easy implementation by yourself
- Lotus Notes search through mail databases, archives, applications, Quickr places and pdf's (in Lotus Domino and on file share) via normal full text index and by use of the File Indexer
- Search with almost any device: iPad, Smartphone, Lotus Notes client, Internet Browser (including iNotes), Web service, including Discovery/Compliance searching and Notes/Web portal searching.
- Sequential search makes it very fast
- Audit full Lotus Domino environment from a single interface
- Conform Lotus Notes security
- Easy to use while comprehensive data is returned
- Accurate results because of the 'did you mean' spell checker
